	FP-2400W	Modulator pt ghirlanda cu 8 programe max 2400W	numai interior	899	30	629

Pentru a diminua costurile instalarii si a facilita montarea elementelor si compozitiilor cu iluminare s-a reusit armonizarea si compatibilitatea conectoroarelor prin sistemul Easy Connect. Simbolul Easy Connect indica faptul ca produsul poate fi conectat cu altul cu acelasi simbol capat in capat si care in acelasi timp poate fi conectat la alte produse prin acest sistem.

Se pot conecta pina la 6 ghirlande Playlight de 10 m capat la capat si astfel se pot conecta 60 m (ex. 600 beculite) la un singur cablu de alimentare cu energie. Ghirlanda Playlight LED permite conectarea a pina la 20 ghirlande de 10 m (ex. 2000 LED beculite) la un singur cablu de alimentare cu energie. De asemenea se pot conecta 8 perdele-ghirlanda de 2 x 1.5 m si astfel se poate crea o perdea-ghirlanda de 16 m lungime cu latime de 1,5 m (ex. 2800 beculite). Pe de alta parte se pot conecta si elemente diferite impreuna, adica o ghirlanda Playlight la o perdea-ghirlanda etc. Accesoriile noastre Easy Connect permit combinarea in diverse feluri a perdelelor-ghirlanda pentru a obtine culoarea si dimensiunile dorite.
